

# Factsheet

## Investment Objective

The Trust's Investment Objective is to provide shareholders with a balanced portfolio of investments in the Asia Pacific region. The Trust's portfolio is outsourced to two managers, Aberdeen Asset Management and Nomura Asset Management, each managing Asia cum Japan mandates aiming to outperform the MSCI AC Asia Pacific Free Index (£). Aberdeen is more focused on stock-picking and generally has a lower weight in Japan. By contrast, Nomura has a more diversified approach, paying more attention to regional weightings within the benchmark index. The aim of employing this combined approach is to smooth out the volatility associated with a single manager. The result of their independent judgments is that the trust has active weightings that are very different from the index, as shown in the table below.

## Trust Information

Epic Code	WPC
Sector	Far East - Including Japan
Trust Type	Conventional
Launch Date	1907
Financial Year End	31 January
Dividend Payment Date	June
Last Ex Div Date	25 May 2011
AGM	June
Shares in Issue	66,244,868

## Geographic Breakdown (%)†

	Trust	Index	Under/Overweight
Japan	26.9	37.0	Underweight
Hong Kong	12.2	5.2	Overweight
Australia	11.6	16.1	Underweight
South Korea	9.0	9.6	Underweight
Singapore	8.8	3.3	Overweight
China	7.2	11.5	Underweight
India	6.5	4.5	Overweight
Taiwan	6.2	7.5	Underweight
Thailand	3.4	1.1	Overweight
Malaysia	2.9	1.9	Overweight
Other	4.3	2.3	Overweight
Cash	1.0	0.0	Overweight

## Sector Allocation (%)†

Financials	25.6	Overweight
Industrials	15.2	Overweight
Basic Materials	12.2	Overweight

## Monthly Commentary

Most Asian stockmarkets retreated in May in line with stock markets globally. Disappointing economic data, particularly from the US, China and Japan, renewed worries over the fragility of the global economic recovery. However the domestic economic environment in Asia has been positive. First-quarter economic expansion remained robust in much of the region, including Hong Kong, Indonesia, Singapore, Taiwan and Thailand.

There are concerns about the timing and pace of Japan's recovery from the earthquake and the ongoing political instability.

During May, Witan Pacific's NAV outperformed its benchmark by 1.6% on a total return basis, delivering 0.9% versus the benchmark's decline of 0.7%. Over the past 12 months Witan Pacific has returned 12.9% in NAV total return terms, outperforming its benchmark by 4.1%.

\*The benchmark for the Witan Pacific Investment Trust PLC is the MSCI AC Asia Pacific Free Index (£).

\*\*The Net Asset Value figures value debt at fair value.

## Important Information

The value of investments and the income from them may go down as well as up and you may not get back your original investment. Investment trusts can borrow money to make additional investments on top of shareholders' funds (gearing). If the value of these investments falls in value, gearing will magnify the negative impact on performance. If an investment trust incorporates a large amount of gearing the value of its shares may be subject to sudden and large falls in value and you could get back nothing at all. Emerging markets tend to be more volatile than more established stock markets and therefore your money is at greater risk. Other risk factors such as political and economic conditions should also be considered. Funds which specialise in investing in a particular region or market sector are more risky than those which hold a very broad spread of investments. Funds investing in overseas securities are exposed to and can hold currencies other than Sterling. As a result, exchange rate movements may cause the value of investments to decrease or increase. Some, or all, of the annual management fee may be charged to the capital of the Fund. Whilst this increases the yield, it will restrict the potential for capital growth. Net Asset Value ("NAV") performance is not the same as share price performance and investors may not realise returns the same as NAV performance. Where a fund holds a limited number of investments and one or more of those investments declines or is otherwise adversely affected, it may have a more pronounced effect on the Fund's value than if a larger number of investments were held.
